

Product #5617A Radiation Relief

Description:

A unique lotion designed for inflamed skin conditions such as atopic dermatitis, radiation burns and stretch mark prevention. Helps reduce inflammation and skin irritation due to radiation treatment. May help with the prevention and treatment of stretch marks and may reduce the risk of decubitus ulcers in the elderly.

Suggested Use:

Gently rub a small amount on the affected area. Apply a second application 15 to 30 seconds after first, if needed for maximum benefit. Use generously 1 to 2 times a day.

Active Ingredient:

Allantoin

Ingredients:

U.S. Patent Pending

Storage:

Keep product above 35°F, to avoid freezing, and below 80°F.
